— O U R — STORY

REGAL TECHNOLOGIES Co. LLC. (Previously known as Rajkamal Communications) is a part of the REGAL GROUP of companies - A 63-year-old business house in Dubai.

The Regal Group of Companies has been in operation since 1952 and has since become a well diversified group with multiple interests in many different core business sectors. REGAL has spread its wings to cover new avenues like technology and real estate to take advantage of the booming Gulf economy.

One such division, RAJKAMAL COMMUNICATIONS (established in 1989) was the first company in the Middle East to offer satellite services to the local population. The company's excellent coverage, unique approach, leading edge technology, and after sales support made it a pioneer in the

region, representing key broadcasters such as OSN, MBC, ART, BEIN SPORTS, and many others.

RAJKAMAL started the region's first digital service center that offers instant response to customers servicing requirements. Extensive training is given to the customer support department as the company believes in taking care of all the clients needs right from installation to after sales support.

The company has now been renamed REGAL TECHNOLOGIES to reflect the expansion of services provided.

In Dubai and Sharjah, REGAL TECHNOLOGIES is playing a significant role in installing, maintaining, and servicing large towers, villas, and buildings. Clients range from prominent members of the ruling family of The U.A.E to several multinational

banks and real estate companies.

Regal Tech has also diversified into installation and maintenance of IPTV based systems since 2009.

SECURTIY

— SYSTEMS —

Regal Technologies offers unique security solutions for a variety of clients in the GCC.

We work with reputed brands from around the world in order to tailor-make solution for each individual client. After understanding the client's need, timeframe, and budget, we carry out a detailed site survey in order to provide several suitable options. We are able to offer state-of-the-art security solutions with cameras ranging from the classic wall mounted units to discreet dome cameras (which can be hidden in order to avoid detection).

We are also able to provide reliable DVRs (digital video recorders) so that the client can keep records for months.

Regal Technologies is the authorized reseller and system intergrator for proffessionalCCTV & surveillance systems manufacturers.
